

# **IPv6 Updates in China, Japan, and Korea**

2009.11.24

Kilnam Chon  
Keio University and KAIST

# 1. China – CERNET2

**CERNET2 is IPv6 Research and Education Network in China.**

- Developed under CNGI, National Project.**
- Backbone traffic is as large as CERNET with IPv4.**
- Many technologies have been developed.**

## **2. Japan – IPv4 Depletion Program**

**Japan formed the project on IPv4 Depletion recently.**

- **Many companies joined.**
- **Government funded the project.**
- **Organized various workshops in Japan (as well as in Asia).**

### **3. Korea – IPv6 Forum**

**IPv6 Forum organizes two workshops every year.**

- **Government is funding the Forum.**
- **Government also funds various projects.**
