Lessons learn thus far

① Continuously update training as technology matures

- New best practices in IPv6
- New transition mechanisms
- RPKI, DNSSEC etc

② Cater to non-network engineers needs

- Modules for managers, and systems administrators
- More workshops in francophone countries

③ AfriNIC-led onsite workshops are not enough

AfriNIC training *2.0!* | The model for success

```
Create | Curate    →    Simplify & Unify    →    Deliver over    →    Evaluate!
GREAT Content            Access                   multiple              Evaluate!
                                                  channels
```

◆ Our members whose support make this possible

◆ Local hosts without whom this would be much harder!

◆ Verena Saydrauten – AfriNIC's travel coordinator

◆ The "partners" we often don't get to see

  ◆ Cleaners who clean and arrange the venues

  ◆ The drivers who wait for us at airports and ferry us around
