Issue Date:

Revision:

# Proposals Reached Consensus Pending EC Endorsement

# prop-113: Modification in the IPv4 eligibility criteria

## Proposal

- Extends the criteria for IPv4 assignments to end users who intend to be multihomed within 6 months

## An organization is eligible if:

- it is currently multi-homed, OR
- currently utilising provider (ISP) assignment of at least a /24, AND intends to be multi-homed, OR
- intends to be multi-homed, AND advertise the prefixes within 6 months

## Implementation

- APNIC will stop asking requestor to confirm which two peers they intend to interconnect with.

# prop-114 - Modification in the ASN eligibility criteria

## Proposal

- Relaxes the criteria for AS Number assignments to end users who already have provider independent addresses and *intend* to multi-home in the future.

## An organization is eligible if:

- they are currently multi-homed, OR
- have previous allocated provider independent address space by APNIC, and intend to multi-home in the future

## Implementation

- APNIC will stop asking requestor to provide two peers as an absolute requirement

# Proposals Under discussion on Policy Mailing List

# prop-115 - Registration of detailed assignment information in whois DB

## Proposal

- Requires the registration of more detailed assignment information to help network operators be more specific when filtering unwanted traffic.

The initial proposal is to include the following information in the APNIC Whois Database:

- IPv4 port number assignments in NAT environments
- IPv6 assignment size to customers

## Status

Failed to reach consensus at APNIC 39 and APNIC 40
